

Firwin Opens New Manufacturing Centre in Alberta

As a result of continued growth in the Western Canada Oil & Gas market, Firwin Corp recently opened a new manufacturing plant in Edmonton, Alberta.

“We felt that to properly service our customers in the Petrochemical, Chemical, and Oil & Gas markets, we needed to have a local presence, not only in regards to sales and service personnel, but also with respect to being able to manufacture our removable insulation covers locally”, said Paul Herman, Firwin’s president.

The facility will be dedicated to manufacturing removable covers to service the Western Canada market.

“Being close to our customers allows us to be more responsive to their needs. Having a facility dedicated to this market allows us to turn around orders faster and ensures we have the capacity to meet larger orders”, said Brett Herman, Firwin’s Vice President of Sales and Customer Service.

In addition to manufacturing, the facility will have its own sales and service personnel. “We are dedicated to meeting the needs of the Oil and Gas market in Western Canada, and we feel that having a local presence is essential for this process”, added Brett.
